

BERKAN TÜRKOĞLU

BACKEND SOFTWARE ENGINEER

berkan.trkgl35@gmail.com | github.com/Berkantrkgl | linkedin.com/in/berkanturkoglu/ | Beşiktaş

SUMMARY

Backend Software Engineer with hands-on experience building production REST APIs and microservices. Focused on Java / Spring Boot, with a strong background in Python (Django, FastAPI) from enterprise client work. AWS-certified, comfortable with cloud deployment and CI/CD workflows.

PROFESSIONAL EXPERIENCE

Cloud Engineer · NovaDSA, Sep 2024 - Present

- Built and deployed production **backend services on AWS** (EKS, ECS Fargate, RDS) for enterprise client projects, including **AI chatbot** platforms and **data warehousing** solutions.
- Designed and maintained CI/CD pipelines with GitHub Actions, GitLab CI, and ArgoCD for automated Docker builds, image pushes to ECR, and rolling **deployments to Kubernetes**.
- Developed backend services in Python (Django, FastAPI) integrated with PostgreSQL and LLM agents via AWS Bedrock and LangGraph.

IT Trainee · Hannover Fairs Turkey, May 2024 - Sep 2024

- Windows Server, Active Directory, networking fundamentals.

PROJECTS

QuitQOS — Habit-Tracking Mobile App · Personal Project, Jun 2026 – Present

- Designed and built the full backend end-to-end using Java and Spring Boot, including domain modeling, **REST API design**, and schema evolution across 6 Flyway migrations.
- Implemented a stateless **JWT-based authentication** system on top of **Firebase Auth**, using a custom Spring Security filter chain with rotating refresh tokens.
- Built a scheduled background job with @Scheduled to detect milestone completions and trigger FCM push notifications.
- Wrote 39 unit tests (JUnit + Mockito) covering service-layer business logic across 7 services.

PaceUp — AI-Powered Running Coach (iOS) · Personal Project, Jan 2026 -

- Architected an **event-driven Django backend** with 6 apps and **18+ REST endpoints**, using signals to trigger stats, achievements, and notifications from a single workout save.
- Integrated **RevenueCat** for subscription payments with race-safe purchase verification across concurrent webhook and client events.
- Built a **CI/CD** pipeline with **GitHub Actions** delivering commit-to-production **deploys in 5-10 minutes** via ECR push and ECS rolling deployments.

EDUCATION

Turkish-German University (Türk-Alman Üniversitesi), 2019 – 2024

- B.Sc. Mechatronic Systems Engineering · GPA: 3.30 / 4.00

SKILLS

- | | | |
|-------------------------------|---------------------------|---------------------------|
| • Java 21, Spring Boot | • Python, Django, FastAPI | • AWS (EKS, ECS, RDS, S3) |
| • Spring JPA, Spring Security | • PostgreSQL, Flyway | • Docker, CI/CD, ArgoCD |
| • Maven, JUnit, Mockito | • REST API design, JWT | • Git, Linux |

CERTIFICATIONS

- AWS Certified Solutions Architect – Professional
- AWS Certified Developer – Associate
